Yes, I did, thank you very much. Is there anything else you guys suggest I look over prior to our meeting next week?

Thanks,

Katie Marko

Subject: Wild Rice Sulfate Standard

Katie, back in 2010 we gathered information on the origin of Minnesota's 10 mg/L sulfate standard applicable to water used for production of wild rice. In case you would like additional background information prior to our conference call next month, I am sending you a CD that has pdf copies of these documents (see attached).

Please let me know if you have any difficulties opening these files.
